Sprints	CABUDL Sprint 4													CABUDI	. Sprint	1										
> CABUDL-17 Download The Dataset																										
> CABUDL-18 Import The ImageDataGenerator Library																										
> CABUDL-19 Configure ImageDataGenerator class																										
> CABUDL-20 Apply the ImageDataGenerator functio																										
> CABUDL-21 Import Libraries																										
> CABUDL-22 Initialize the Model																										
> CABUDL-23 Adding CNN layer																										
> CABUDL-24 Adding Dense Layer																										
> CABUDL-25 Configure The Learning Process																										
> CABUDL-26 Train the Model																										
> CABUDL-27 Save the Model																										
> CABUDL-28 Test the model																										
> CABUDL-29 Create Html files																										
> CABUDL-30 Build Python code																										
> CABUDL-31 Run the App																										
> CABUDL-32 Register IBM Cloud																										
> CABUDL-33 Train the model on IBM
